company profile

Papadopoulos Plastic Profiles S.A., is manufacturing plastic profiles for decorative and technical applications.

The company established in 1962 by John Papadopoulos and it's first production was plastic pipes and decorative profiles for suitcases and shoes. During the 1970 decade the company activated in the fields of fendering profiles for boats, plastic profiles for aluminum windows and profiles for several technical applications.

In 1993 transformed in S.A. and activated in the export's field with sales to Saudi Arabia, Egypt, Cyprus and the European Union.

The factory has production capability of 1.000 kilos per 8 hours and production ability up to 10 kilos per product meter.

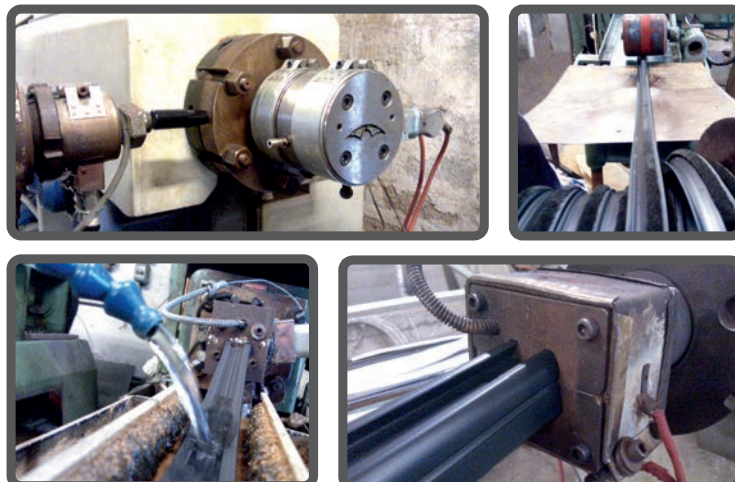

There are about 2.000 dies for the profiles production that are purposed for boats, offices partition, plastic gaskets for aluminum windows, complex glass partition, plastic skirting boards for offices and hospitals, wall bumpers for hospitals, plastic profiles for the interior and exterior of motor coaches, expansion and water-tightness joints for bridges, concrete water tanks, athletic stadiums, docks and many other applications.

It is also possible to construct new dies for any type of profile.

Our over 50 years long experience, the high quality of the raw materials and the solution on every technical problem of application, in every field of our activity, placed us first in choice of the most technical companies and shipyards in Greece and increased our exports, especially in the last 15 years.

The company is member of the Industrial Chamber of Athens, the Hellenic marine industry Association and the Hellenic Subcontracting Association.
